 James Gagen *
 Cole Mellino
 Michelle Nochta
 Jan Snow
 Mike Stewart *
 Patrick Wadden

* indicates that these individuals informed us of scheduling conflicts and are planning to tour on an alternate date

Bob Greytak started the meeting by introducing Bill Crute, who is manages Lakewood's Waste Water Treatment Plant, and has been working there for 45 years.

Bill Crute lead the tour, starting by walking over the bridge to show us the influent pipes, and then walking through the plant viewing the screens, preliminary treatment, secondary treatment, UV disinfection, and sludge processing. Bill also gave an overview of the new aerial sewer that will be built across Rocky River and will eliminate two combined sewer overflows. Two handouts of the treatment plant were provided to the attendees. Additionally, maps of the following were provided to the group: 1) treatment plant, 2) 55 overflow locations into Rocky River and Lake Erie, and 3) the combined sewer overflow sewersheds of Lakewood.
