### **City Transportation Accessibility Pilot Program**

The city is accepting applications for a new pilot Transportation Accessibility Program (TAP) that will serve residents of Lakewood aged 18-59 who are considered to have a permanent disability. TAP will offer them round-trip transportation services, twice a month, to their routine medical care appointments. The city is partnering with Senior Transportation Connection (STC) to provide scheduling and transportation services for this program. Together a menu of transportation options are being explored including further partnering with transportation network companies like Uber and Lyft. These types of creative solutions will maximize the number of residents TAP is able to serve. This program launched in May.

If you know someone who might benefit from this program have them visit <http://www.onelakewood.com/tap/> to learn more about the program and complete the application or contact Human Services at: 216-529-6685
